Audience	Third-grade English undergraduates						
(Language of Instruction)	English Chinese						
* School	School of Foreign Languages						
Prerequisite	Foundations of Translation, Translation Practice						
Instructor	(Course Webpage)						
	6						
* Description	“ ”						
* Description	<p><i>An introduction to translation criticism</i> is a mandatory course for all undergraduates of English majors during the 6rd semester. The aim of this course is to provide its students with the tools to evaluate the quality of a translated text both as a self-standing aesthetic object and as a means for reaching forward to the cultural network of the source text. The course will focus on literary translation, and the practice of translation criticism will be approached by means of comparative analysis, whereas different translations of the same source text will be compared and evaluated as degrees of approximation toward the substance of the source text. A translation work, though deriving from a source text, is a form of interpretation and “making explicit” of the source text’s elusiveness in which a translator do the job of decipherment. Therefore renditions always bear their translators’ thumb prints in terms of their personal preferences, political stance social background, and so on. Through discussions on translation works of modern and contemporary time, this course attempts to improve students’ competence in appreciating translation works and honing their skills in the practice of translation.</p>
