* Description						
* Description	<p>As a course for German majors in the senior year, it deals with translation in the fields of science and technology as well as trade and economy. By translating articles in these two fields, students can improve their translation skills on the one hand and learn more science and financial terms on the other. It covers contents ranging from entry into the 21st century, energy technology, information technology and electronics, automation and electrical engineering, transportation and engine technology, financial accounting, packaging and shipment, claim and arbitration, to stock exchange.</p> <p>Students will be equipped with basic vocabulary and knowledge as well as professional knowledge in the two fields. Apart from that, they'll improve their comprehensive German skills and the ability to think in German so as to qualify for working in a globalized world economy.</p>
