

Course Information					
Course Code	EN362	* Credit Hours	32	* Credits	2
* Course Name	Sociolinguistics				
(Course Type)	Mandatory				
Audience	Fourth-grade English undergraduates				
(Language of Instruction)	English				
* School	School of Foreign Languages				
Prerequisite					
Instructor			(Course Webpage)		
* Description	Goldvarb X				

*

Description

This course is designed to familiarise students with the key concepts of sociolinguistics with a focus on the Labovian variation theory and the quantitative approach to the study of natural language data gathered in a range of linguistic and social contexts. This course will address different aspects of phonological, grammatical, and pragmatic variation, and language contact, focusing on key issues such as identifying variables, circumscribing the variable context, extracting, coding and analysing data using GoldVarb X, and examining social and linguistic factors that condition linguistic variation. We will also look at the language use in the Chinese speech community and examine the implications of variation for SLA theory. Students

	(Gender, space)				
	Other correlates of variability II (age, ethnicity, race)	2			
	Application of variation theory I: Language Contact	2			
	Application of variation theory II: Second Language Acquisition	2			
		2			
* (Grading)	70%		20%	10%	
	Term paper (70%); mid-term test (20%); regular performance (10%)
